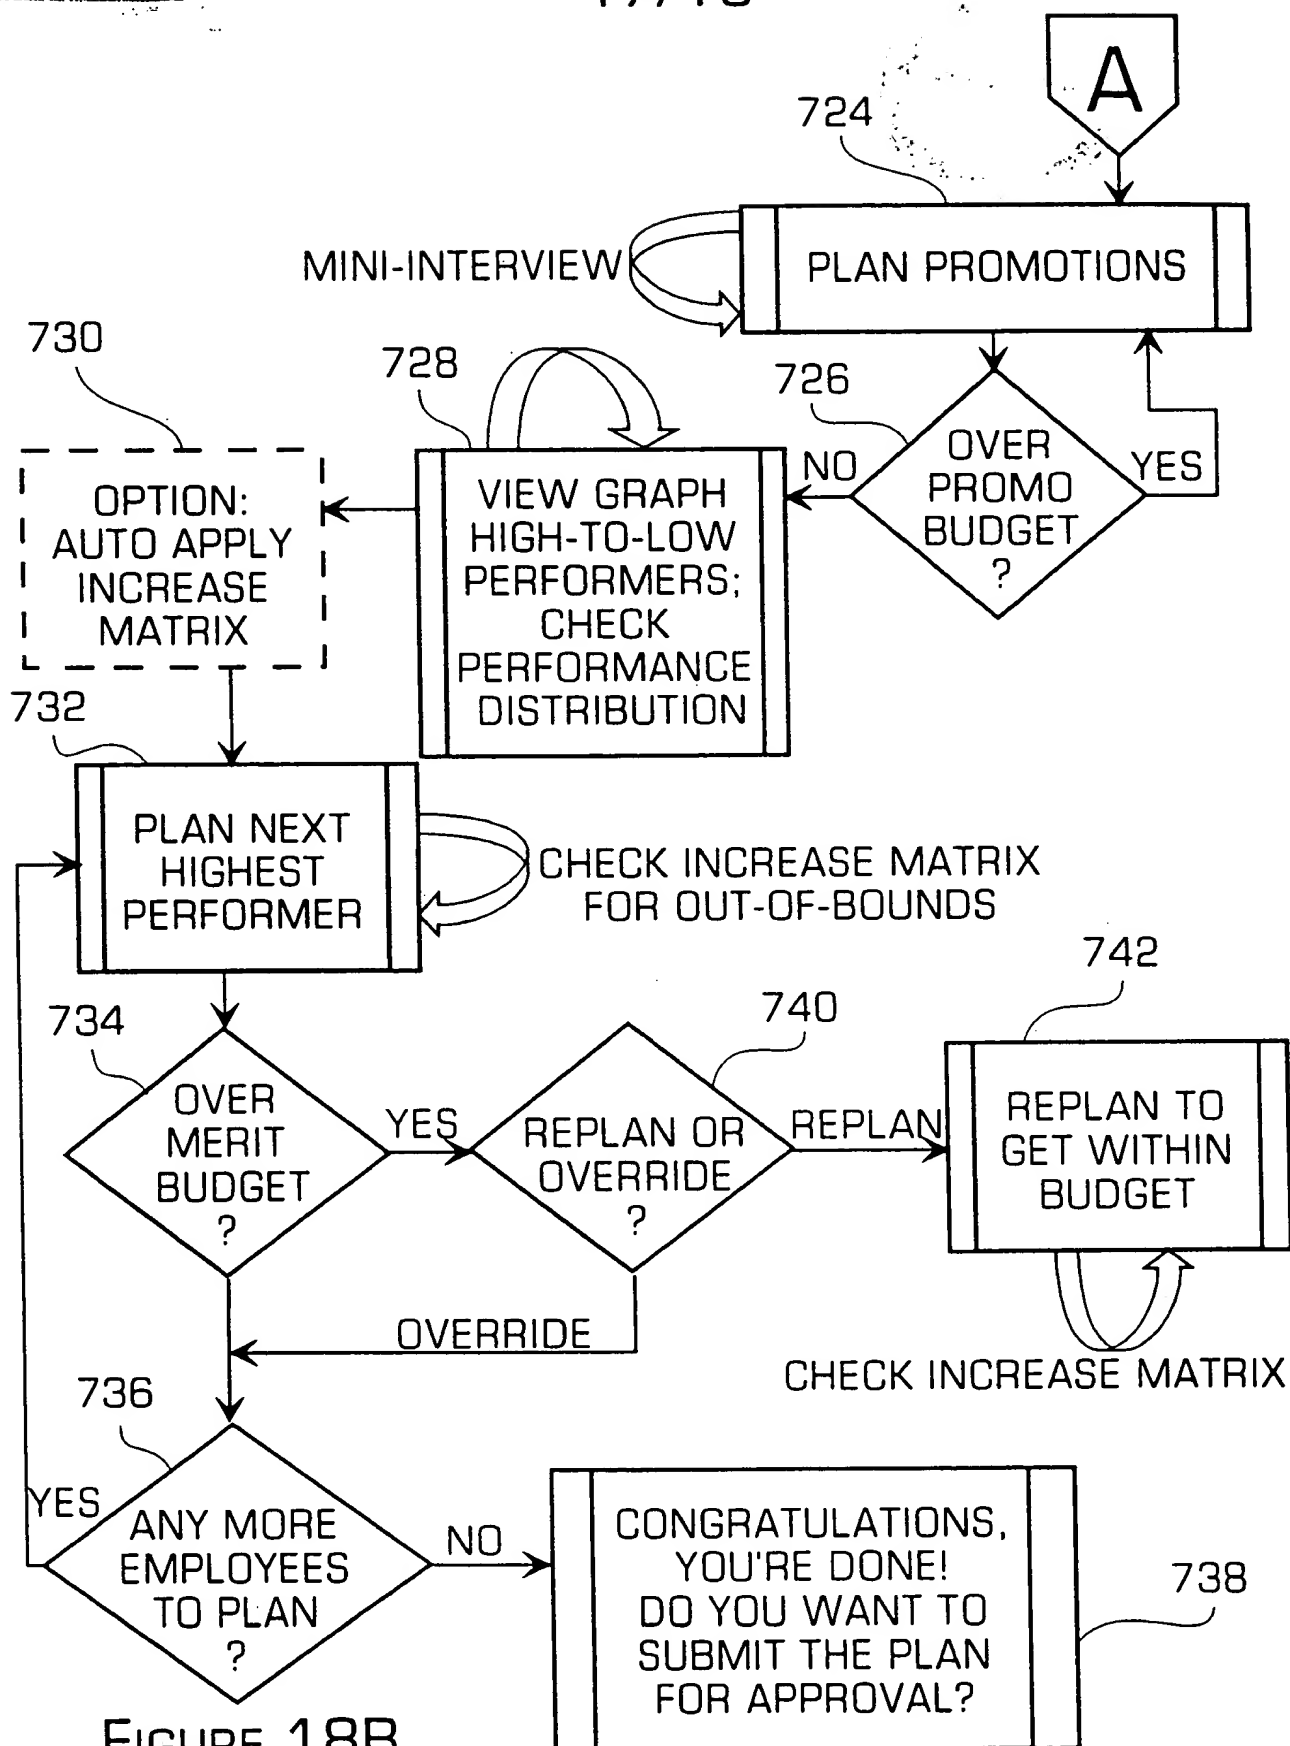

FIGURE 18B

GUIDANCE FOR STACK RANKING OPTION

"Stack ranking" is defined as a 1 - n ranking of employees based on their performance against their job description. It is not meant to be a ranking of their value to the company (that kind of ranking is sometimes called a "reverse layoff" list). Thus a junior engineer could be ranked higher than a senior engineer simply by virtue of doing his/her job better. Junior level employees who are ranked very high in their grade are often candidates for promotion to the next level in that job family (i.e., it is time to make their job more difficult). This usually results in them having a lower stack ranking and a lower performance rating in the next planning session.

If you have employees in different salary ranges or grades, then you can first do the ranking within each grade. Then in order to merge the ranking into one overall list for your group, use the technique illustrated by this example:

E10 Employees:

1. Karen Feiding
2. Fred Klutz
3. Joe Smith
4. Irving Fazola
5. Jane Doe

E09 Employees:

1. Sam Spade
2. George Gap
3. Susie Emblem
4. Roberto Cruz

E08 Employees:

1. Fannie Farmer
2. Jim Keiper
3. Allan Jones
4. Anna Storm
5. Evan White
6. Bill Baker
7. Lavon Larue

To start the merge process on these lists, you choose which employee is the number one overall employee in how well they do their job. Obviously, the only candidates for this honor are the three employees who rank at the top of their respective grade ranking. In this case, the candidates for #1 overall are Karen Feiding, Sam Spade, and Fannie Farmer. So let's say you pick Fannie Farmer as the best at their job of those three. That puts Fannie on top of the overall stack ranking list. Then you pick the employee who ranks second overall. The candidates are Karen, Sam, and Jim Keiper because Fannie is already placed. Continue in this manner until you have a total merged list from 1 - n.
